Whether your fur baby is a puppy, a senior, or somewhere in between, increased outside time and more activity in warm months can result in injuries, exposure to flea and ticks and seasonal allergies. In this class you will learn the "Summer Tune-Up" Acupressure protocol, how to do a monthly nose to tail wellness exam and about a variety of naturopathic support methods for summer issues. A representative from Sativa Valley Essentials will be with us to discuss the use of CBD products for dogs and each participant will receive a sample CBD product for your pup.

Seating for this class is limited.

There is a \$10.00 charge for this class
